How to Keep Yule Plants

Yes, those cherished holiday plants can keep on growing into next year.

As a tropical plant, poinsettias like plenty of water and warmth—70 to 80 degrees. Be sure to keep these plants in a warm place at night.

Though they blaze with fiery-red-colored bulls, Jerusalem cherries are rather cool natured. For them, the temperature should be held at 60 to 65 degrees. Avoid overwatering.

Huge Tree Is Symbol of Man

A French story of the 13th century relates how a huge tree was discovered in a forest, its branches lit with candles.

Some branches rose straight up, while others were turned down. Atop the tree was a child, with a halo around his head.

The story explains that the tree is mankind. Its candles represent people good or bad, and the child is the Christ Child.

Greens Have Meaning

Greens that adorn home, streets and stores at holiday time entered the lore of Christmas from pagan rites of old.

The ancients believed that each green had its own significance, and an ability to do certain good – or evil – things.

Ivy, they thought, was festive. Its convivial nature came from Bacchus.

Yew and cypress had the highest virtues. Theirs was the quality, and the symbol, of eternal life.

Dan Daniel Named to Special Subcommittee

WASHINGTON - Fifth District Congressman Dan Daniel has been named to a Special Subcommittee on "Department of Defense Energy Resources and Requirements," under the House Armed Services Committee.

The five-man subcommittee has been charged with inquiring into all aspects of the energy problem, as related to the defense needs. Hearings will be announced in the near future.

In announcing the appointment of the subcommittee, Chairman F. Edward Hebert, Jr., of the House Armed Services Committee, pointed out that the Department of Defense is the largest single consumer of energy in the United States. Thus, the subcommittee will seek to assure that the armed services have sufficient energy resources to meet their needs, without having any adverse effect on the domestic economy during the energy crisis.

The subcommittee will be equipped with subpoena powers and its area of inquiry will include, but not be limited to, a review of the energy requirements of the Department; available resources within and outside the Department's control to satisfy those energy requirements; current and projected energy shortfalls within the Department; steps being taken within the Department to cope with the energy problem; energy alternatives and the impact of those alternatives on our military posture and their related budgetary implications; possible future energy sources that may be available to the armed services and requirements for additional research and development effort to develop new energy sources for possible military application.

Inspires Music

In serious music as well as popular carols, the Nativity scene lives on.

Handel's "Messiah," Bach's "Christmas Oratorio," Berlioz' "L'Enfance du Christ" are noteworthy examples of music performed year after year at Christmas.

More recently, Britten's "Ceremony of Carols," Honegger's "Christmas Cantata" and Menotti's "Amahl and the Night Visitors" have joined the holiday medley of musical treatments.

Told in Rhyme

The story of the Nativity and its meaning for mankind is a favored poetic theme, as is the holiday cheer of hearth and home.

Poets as diverse as William Shakespeare, Samuel Taylor Coleridge, John Greenleaf Whittier and T. S. Eliot have made their contributions.

Numerous carols first were poems—witness Henry Wadsworth Longfellow's "I Heard the Bells on Christmas Day":

"I heard the bells on Christmas Day
Their old, familiar carols play,
And wild and sweet the words repeat,
'God is not dead, nor doth He sleep.'"

Probably the overwhelming winner among widely-known secular Christmas poems is Clement Clark Moore's "A Visit from St. Nicholas."

The poem, written for his own children in 1822, is popularly called, "'Twas the Night before Christmas."
